

FF AC 8000/10000

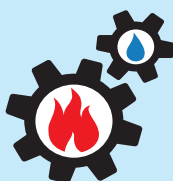

Tanker truck for drinking water transport

Made in Croatia

Characteristics

- ❖ Flammifer FF AC 8000/10000 is a tanker truck for drinking water transport either as a support firefighting vehicle or a utility vehicle for drinking water distribution
- ❖ Tank capacity is 8.000 or 10.000 liters. It is equipped with a pump for water flow 1.000-3.000 l/min at 10 bar pressure.
- ❖ In firefighting version there is a possibility of installation of a suction pump for suction of water from external source. „STORZ A“ type of connector and a turret can be installed in a firefighting version of a vehicle.
- ❖ In a utility version, sprinklers for road washing can be installed on front side of a vehicle. Sprinklers are controlled by a driver in a cabin.
